Turn on potentiostat and plug in USB. Microsoft Windows® detects your potentiostat, and a Found New Hardware prompt appears. If necessary, select Install Software Automatically.

Open the Gamry Framework™. Gamry Instrument Manager software automatically opens, showing the new instrument and its characteristics.
5. To change the label of an instrument, click on the pencil icon next to the instrument’s label.

6. Close the **Instrument Manager**.

7. After a moment, your potentiostat should appear next to **Devices Present** along with a green virtual LED. Repeat for additional potentiostats.

8. Next, follow the steps in the **Quick-start Guide #2: USB Potentiostat Calibration** to calibrate your potentiostat.
